EXPLORING
to what extent tech objects
can become truly timeless and
transform the wear-and-tear
tech consumer culture.

TRANSPARENT SOUND

TRANSPARENT SPEAKER

Our original speaker delivers a powerful yet balanced sound that can fill almost any room with great
sounding music.

Materials: Tempered glass and aluminium
Wireless: Bluetooth 5
Dimensions: 431/333/118 mm
Weight: 10 kg
Acoustic Volume: 10 l
Frequency Response: 35 Hz - 20 kHz ±5 dB

SMALL TRANSPARENT SPEAKER

The smaller transparent speaker has a surprisingly big sound. It has a warm and deep bass, clear mids and crisp details in the high frequencies.

Materials: Tempered glass and aluminium
Wireless: Bluetooth 5
Dimensions: 268/203/95 mm
Weight: 3 kg
Acoustic Volume: 3 l
Frequency Response: 60 Hz - 20 kHz ±3 dB

“We aim for our products to transcend trends, become better with time and potentially live forever.”

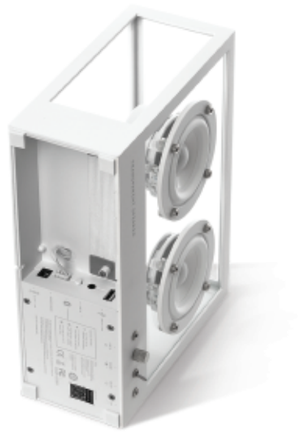
OUR APPROACH TO TECHNOLOGY

Tech changes fast these days. We believe products should be able to improve at home in stead of being thrown away.

Our products currenctly come with the latest Bluetooth protocol, but they are built to be upgraded over time.

They can also be equipped with Wifi modules for multi-room or even voice control usage. Modules can be mounted and powered in the bottom / rear compartment.

The only thing needed to play music is a press of a button to connect, simple as that.



STEEL SPEAKER

Hand forged of repurposed steel panels by blacksmith Jonas Majors on the island of Mörkö outside of Stockholm. Built with components from our big transparent speaker it produces a powerful and balanced sound.

Materials: Blackened steel
Wireless: Bluetooth 5
Dimensions: ~ 431/333/118 mm
Weight: ~ 13 kg
Acoustic Volume: 10 l
Frequency Response: 35 Hz - 20 kHz ±5 dB

THE UPCRAFTED COLLECTION - SPEAKERS REBORN

We always want to bring a perspective of nature into the world of technology, with this collection we take it one step further. By collaborating with artisans we make three limited speaker editions that embodies the hand-made. A study in natural materials, textures and hand made techniques.

Not only does this collection represent our strive to take “tech” further into the design object category, it is also a way to show how materials and components can become upcycled into ever new formats.

STONEWARE SPEAKER

Crafted by ceramic artist Hortense Montarnal in Lyon, France. The ceramic material is not only beautiful, it also has great acoustic properties.

Materials: Stoneware ceramic clay
Wireless: Bluetooth 5
Dimensions: ~ 268/203/102 mm
Weight: ~ 4 kg
Acoustic Volume: 3 l
Frequency Response: 60 Hz - 20 kHz ±3 dB

WOOD SPEAKER

Wood is a classic material for loudspeaker cabinets, but we wanted to bring the precision of furniture craftmanship to the world of electronics. We teamed up with Stockholm based DRY Studios to build our reinvetion of the wooden speaker.

Materials: Solid Swedish ash
Wireless: Bluetooth 5
Dimensions: 268/203/98 mm
Weight: 3 kg
Acoustic Volume: 3 l
Frequency Response: 60 Hz - 20 kHz ±3 dB
