**IS YOUR HAND
SANITISING SYSTEM
TOUCH FREE?**

Is your hand sanitising system touch free?

Multiple numbers of potentially infected fingers placed on a pump dispenser one after the other makes having a hand sanitiser ultimately futile. Touch-free systems will significantly cut down the risk of infection and really should be the only method used.

Can users choose whether to sanitise or not?

Our busy lives, and simple human nature dictates that unless we are compelled do something we invariably go for the path of least resistance! A recent anecdotal observation outside our nation's largest DIY retailer revealed that in a 10-minute timeslot, all twenty customers that walked into the store, completely ignored the sanitiser pump located next to the door. Mandatory sanitising units integrated to building entry systems, where access is denied if hands are not sanitised, are by far the best way to ensure that every entrant has effectively cleansed hands.

STERILOC IN NUMBERS

Steriloc is an anti-virus entry system that allows people to enter a workplace, school, community hub or gathering place only if their hands are quickly and thoroughly cleansed with a powerful automatic touch free hand sanitiser.

After a person has cleansed their hands, an electrical signal triggers a door catch, turnstile or even an alarm ensuring that your workplace hygiene is not compromised.

Steriloc will demonstrate your commitment to achieving a COVID free workplace and form a key part of your risk mitigation strategy to give reassurance to your workforce that their return to work is as safe as can be during the pandemic.

Manufactured in the UK to exceptional standards, our touch free sanitisers are surprisingly affordable for something that can save sick days, give customers added confidence and protect your employees.

Steriloc instantly cuts the risk of cross-contamination, and proven to reduce absenteeism in the workplace. The Steriloc units can be on free standing pedestals, wall mounted or linked to entry mechanisms and can be used with an extensive range of sanitising liquids available in the market place.

Sporting events in Britain and around the world came to a halt in March 2020 due to the Coronavirus outbreak. Since then, almost no fans have been allowed to enter stadiums to watch the events. Fans will soon be able to enter the stadiums but will need to social distance, wear masks and most importantly sanitise their hands regularly. A Steriloc unit is the only system that can guarantee each fan sanitises their hands upon entry whilst within the stadium.

STERILOC SENTRY

The Steriloc Sentry is available with an internal 2.5Ltr reservoir. Our Sentry unit is designed to fit where space is a premium. If you want to increase the capacity of the Sentry due to increased footfall, you can add an additional 25Ltr external reservoir. This would provide up to 25,000 dispenses between refills.

The Sentry is suitable for a variety of applications from door and turnstile entry systems in **factories**, offices, surgeries, nurseries, schools and warehouses to building sites.

An additional Wi-Fi box can be installed into the Sentry at a small additional cost. This will send an email alert to you, indicating the sanitiser is low and needs replacing.

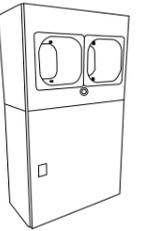

**PERSONALISE
WITH YOUR BRANDING**

Steriloc Sentry 65	SL-SD-BU16-AC	●			●		●	●

STERILOC SHIELD

The Shield is our newest member of the Steriloc group. It is our low-cost model, yet is still as robust, quick, and reliable as the other Steriloc members. The Shield is aimed at users that do not require all the additional smart technology. The Shield is a standalone unit but can be connected to an access control pack at an extra minimal cost. With a large 5 litre sanitiser capacity, the Shield can dispense up to 5000 times between refills.

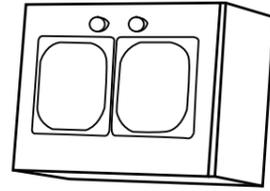

The Shield can be powder coated or wrapped in your company branding and is suitable for indoor and outdoor use.

A Steriloc Shield can quickly sanitise thousands of fans entering a sports stadium at up to 30 people a minute. The Steriloc system can be linked up to a turnstile system guaranteeing each person is efficiently sanitised.

BRAND NAME	PRODUCT CODE	FINISH		POWER
		Grey Powder Coated	Steriloc Branded

Steriloc Shield 65B	SL-SD-SUI3-AC		●	●

STERILOC SENTINEL

The Sentinel is our smallest and most compact member of the Sterilloc group. It was designed to be situated at a checkout or reception desk with a separate 25Ltr reservoir located out of sight. The Sentinel is the perfect addition to any work environment, providing the vital hand sanitation needed whilst discreetly fitting into the surroundings.

Alternatively, the Sentinel can be mounted on a stand with the 25Ltr capacity external reservoir. The 25Ltr capacity can dispense up to 25,000 times between refills. It can be powder coated, stainless steel or wrapped in your company branding.

The Sentinel can be purchased with the following capacities: 2.5, 5, 10 and 25Ltrs.

STERILOC SENTINEL PRO

The Sentinel Pro is our largest member of the Sterilloc group. It has been designed to be freestanding with the ability to showcase your company branding. The Sentinel Pro can be supplied in a plain powder coated finish, Sterilloc livery or personalised branding to leave a lasting impression on the users.

The robust steel provides a secure and weatherproof unit with the ability to be placed indoors or outdoors. The large cabinet can store up to 25Ltrs of sanitiser with the ability to sanitise up to 25,000 times before refilling.

The Sterilloc Sentinel Pro can be battery powered, as shown on the image to the right. There are 17 Sentinel Pro units located at King's Cross, London.

WHY A STERILOC SANITISING SYSTEM?

Quick - sanitise up to 30 people a minute.
Up to 25k dispenses between refills

Easy install - easily mounted on a wall, counter top or left free-standing. A unit can be installed at any entrance

Personalise - chose between powder coated and stainless steel or add your company branding to the Steriloc unit.

Cost effective - each dispense can cost less than 1p. The lockable unit also prevents sanitiser theft

Power options - all units can be 110v to 240v AC, POE or battery powered

Absenteeism - Steriloc can potentially reduce workplace illness

Weatherproof - all units can be used indoors and outdoors*
*Except units with internal reservoir

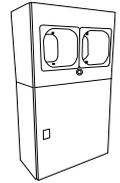

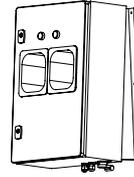

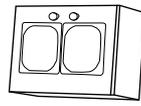

Secure - be confident that access is only gained once both hands have been sanitised. When linked to access, Steriloc ensures mandatory user compliance

Environmentally friendly - precision dosing ensures less waste per use. There is no need for paper towels and no plastic bottle waste

Wi-Fi connected - each Steriloc unit may be Wi-Fi enabled, allowing email notifications to monitor usage and sanitiser levels**
