

# Your hotel without plastic waste

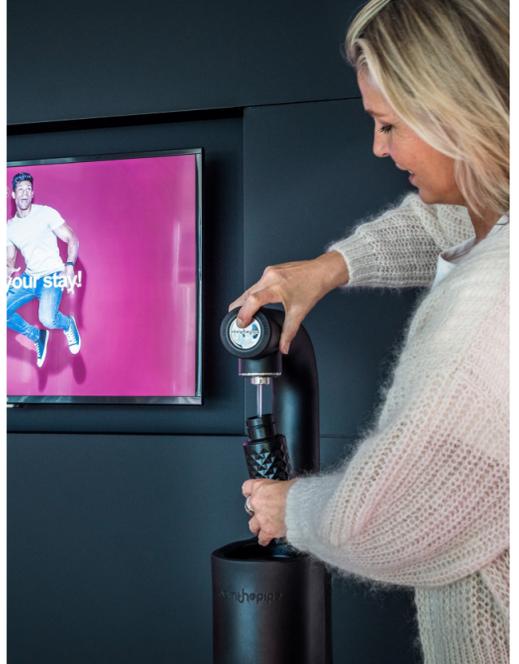

## Go reusable with Join the Pipe

Many hotels have trusted us to help them reduce their plastic waste. Some well-known hotels have already installed water fountains and sold customised water bottles, including the Hilton Hotel chain, Radisson, Sheraton and many smaller hotels and hostels. They decided to become pioneers when adopting alternatives to single-use water bottles. By offering (prefilled) water bottles in hotel rooms and inviting guests to fill them in the lobby, on the different floors or outside areas where water fountains are available, they have managed to reduce a significant amount of single-use bottles.

Are you planning to get rid of your plastic cups and bottles?  
Join the Pipe will help you in your transition.

## Stainless steel water fountains

Join the Pipe offers outdoor and indoor water fountains that are resistant and have a stylish, timeless design. The fountains can offer filtered, refreshing and sparkling water as well as being customised with the colour of your choice. They have been WRAS, ACS and KIWA certified. We offer a wide range of floor and wall mounted models.

## Sugarcane water bottles with your logo

Our reusable bottles are made in the Netherlands from sugarcane. They're customisable with the hotel's logo as a sustainable promotional tool. The bottles can be used in hotel rooms, reception areas, bars, meeting rooms, spas and pool areas. Offering 0.5 L, 1.0 L and 1.5 L models, we can meet any demand and can also offer them in filled versions. By offering pre-filled bottles, you offer a simple and effective solution to single-use mineral bottles.

## Drinking water for everyone

With the sale of our taps and bottles, we finance water supply projects in Africa. We have already completed over 350 projects and thanks to you we can continue our fight against plastic all over the world. Find out more about our projects and products on our website.
