

Join the pipe

From single-use to multi-use with Join the Pipe

We are a worldwide community of tap water drinkers. We encourage people to have a healthier and more sustainable lifestyle by drinking fresh (filtered) tap water. By doing so, we contribute to a better world.

We provide a total solution to eliminate single-use plastic water bottles. With our **reusable water bottles** (empty or filled) and our **indoor and outdoor refill stations**, we offer an affordable alternative to disposable plastic bottles and make sustainable tap water easily accessible where people work, play, commute, exercise and relax.

Reusable water bottles, made from sugarcane

Contribute to a world with less plastic waste with these affordable refillable water bottles. Our bottles are made from sugarcane, produced in a sustainable and circular way. **The bottles are easy to customise with your company or event logo.**

Choose your favourite design, colour ring or cap, your city (more than 30 cities worldwide) or design your own. All bottles are available in a 2-piece model and a 4-piece model, with an extra drink cap and colour carrier ring.

Outdoor & Indoor Refill Stations

Elegant and recognisable design, a clear sign for safe tap water in your city, campus, courtyard or company. **The taps are made of stainless steel**, standard colours are black and white, with other colours available on request. With their beautiful matte finish they fit nicely into any space or environment.

Easy to connect to the existing water supply, low in maintenance and easy to use. Our water taps comply with the **highest quality and hygiene requirements**. The indoor taps can provide **still water**, as well as **(filtered) cooled and sparkling water**.

- ✓ Stainless steel AISI 316
- ✓ Minimalistic and recognizable design
- ✓ Easy to install, use and maintain
- ✓ Resistant to vandalism
- ✓ Highest quality and hygienic requirements
- ✓ WRAS, KIWA, ACS, DVGW and NSF certified

Join the Pipe City Water

In most countries tap water is not the same as drinking water. That's why we created City Water, a tap water brand that is safe and trusted to drink around the world.

Locally bottled (filtered) tap water in a reusable bottle made from sugarcane. Designed with your city skyline or any attractive design. The most sustainable drink in the world and popular with locals and tourists alike.

City water can be sold, bottled, refilled and served in every city, supermarket or hotel around the world. From the tap, filtered if necessary, chilled if desired.

Clean drinking water for everyone, everywhere

It's our mission to give everyone in the world access to clean sustainable drinking water and tackle plastic pollution at its source.

We use our proceeds to set up drinking water projects and clean-ups in developing countries. To date we've installed over 5.000 taps and partnered up with many businesses and city councils to use our sustainable bottles and taps. As a result, we've been able to provide access to clean drinking water, to many of those without.

Refill. Reuse. Reduce.
