### Odour-Fighting Underarm Scrub

This 100% vegan underarm scrub contains only 5 natural ingredients! It keeps your underarms fresh for up to 16 hours. Premium kaolin clay draws the bacteria - that cause the odour - out of your underarms. Recycled coffee powder neutralises the odour. You will never use (chemical) soap again!

75ML / 2.5 FL. OZ.

**REDUCES DARK APPEARANCE**

This underarm peel can stimulate cell turnover, which can make your skin surface appear brighter, smoother and in some cases, lighter.

**REMOVES DEAD SKIN CELLS**

With the help of premium kaolin clay, we have ensured that dead skin cells are removed.

**ODOUR CONTROL**

By not using perfume, we’ve ensured that the scrub eliminates odour rather than masking it. The coffee powder helps to remove odour-causing bacteria while rebalancing your underarms and neutralising odour.

**DEEP CLEANSING**

The premium kaolin clay sucks the bacteria out of your armpits.

**REDUCES ANNOYING BUMPS**

Your underarms are a very sensitive part of your body, which is why rough scrubs can cause pimples. We have used reusable (washed and sterilised) ground coffee, which has an ultra-gentle texture, even for the most sensitive skin that needs a soft and pleasant exfoliation.

Together we reuse coffee grounds!

Dutch people drink the most coffee in Europe. (Source statista.com)

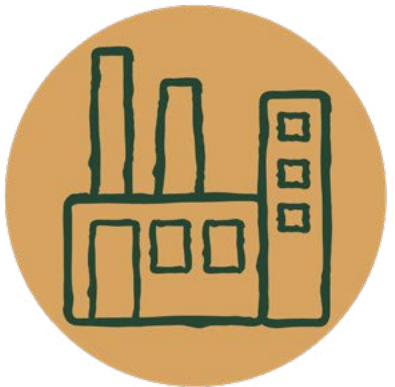

Over 100 million KG coffee residue is wasted every year in The Netherlands.

So we started collecting a tiny portion of this residue. Because the benefits of coffee residue for skin are tremendous!

The final product; a life-saving daily armpit scrub, which keeps your armpits fresh for up to 16 hours!

We reuse the clean residue and add just 4 extra super ingredients to the mix.

The coffee residue is being cleaned and washed.
