- Model Series: CK01
- Product Name: Built-in Type Power Netbox
- Configuration: 2 CCC 5 holes power, 1 dual USB charger, 1HDMI, 1VGA
- Longest Size: 7 modules
- Shortest Size: 2 modules
- Dimensions: 256W x 81D x 43H mm
- Cutting hole: 237W x 72D
- Rated Current: 10A
- Rated Power: 1100W/110V
 2200W/220V

Installation method | Reference Data

Functions and Characteristics

CK01 is a newly developed built-in type power netbox which can be installed at partitions, on desk surfaces or on the sofa. Different installation methods can be applied to suit different situations. The installation methods are simple and easy. The power connection of the power netbox can be connected in series to each other by using an inter-connecting cable to minimize the power outlets and save cables. According to the usage, connection cables can come out either from the side or the back of the power netbox. CK01 has already been approved with UL,3C, CE & RoHS certification.
The length and modules of the power netbox can be customized with country specific power modules, various types of network cables, telephone cables, VGA, HDMI, video, audio, USB data or charging and overcurrent protection modules in any combination.
