

HOS-01

The HOS-01 is a smaller version of our BTC Vault. With a single button operation, a 90 degree rotation puts the technology at your fingertips.

- The smaller footprint allows for more options to install in different areas for more opportunities to add power where needed.
- Installation is a breeze with the 2 clips that snug up against the furniture.
- 2 power and 2 charging USB ports allow for the user to power up their device wherever the situation calls for it.

Finish: Satin Aluminum

Accommodates up to a 2" surface depth.
