REMOTE CONTROLLED CORDLESS LAMPS

OBELIE

JEU DE LUMIÈRE SANS FIL

CORDLESS LAMPS FOR EVENTS

We manufacture **premium cordless lamps** with dual LED lighting (economical and durable). Customizable colored light in the diffuser and indirect lighting under the diffuser.

Our advantage... **induction charging** on a standard or customized charging base. The lamp turns off automatically while charging but keeps the last settings in memory. Controllable by switch or remotely, it's your choice!

The indirect light does not dazzle and creates a warm atmosphere that favors the tête-à-tête. Heavy, solid stainless steel lamp, wind and water-resistant. Easy to clean with a damp cloth.

REMOTE CONTROLLED LAMPS

Our lamps **equipped with Wifi receiver** can be controlled at distance by a DMX console in the control room or by a remote control or via a Smartphone/Tablet application: change colors, lighting scenarios and sequences, luminous power... A truly dazzling option!

FLIGHT-CASE WITH INDUCTIVE CHARGING

Charging by **induction** avoids manipulations that weaken the cables or connectors. The implementation is easy (I put the lamp on the table, it works), **the storage** is fast (I store, it charges).

We provide a **2 in 1 solution**: flight-case transport **tiltable** case that also acts as a charging station. 1 plug to connect, it's 15 lamps charged!

WITHSTANDS ULTRA-INTENSIVE USE

Our lamps are designed for **intensive professional use**. The choice of LiFePO4 batteries allows 3x more charge cycles than a Li-ion battery. The PCB specification has been done in France, and the assembly is also done in the country. The lamp stand are machined, the assembly is of quality, the whole lamp is designed to last for long!

FAST PAYBACK

10 SERVICES*

The return on investment **is fast**: generally the cost of a lamp is compensated after 10 services, so the balance is reached after **8 months**

* in the Paris area

INOX STAND

TESTIMONIALS

Thanks to Obélie wireless lamps and a few battery-powered «black box» type projectors, we are able to provide lighting for dinners in unusual places without electricity, in the middle of the countryside, it's phenomenal! Any person can set up everything in record time.

Jean-Luc
Lighting Technician, Toulouse (31)

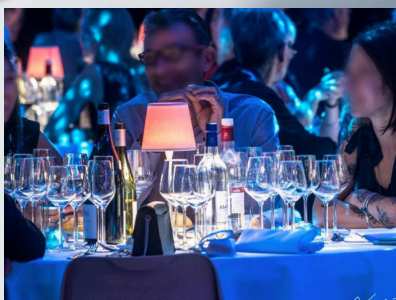

Villa-Savoie brings a neat and personalised finish to the dinners where we work. The remote DMX control is an asset to set the scene, the entrance of the guests or to entertain between 2 meals, with great ease.

Mickaël
Novelty, Grand Ouest

We fitted our room with Obélie lamps equipped with the remote control module. Thus we can modulate the lighting atmosphere table by table, create effects to accompany the show... It's magical!

Patrice
Le Grand Cabaret, Vieux-Berquin (59)

We can integrate our system in any existing structure, **a lantern** for example, for any event
