CORDLESS LAMPS

OBELIE

JEU DE LUMIÈRE SANS FIL

CORDLESS LAMPS FOR THE HoReCa MARKET

We manufacture **premium cordless lamps** with dual LED lighting (economical and durable). Customizable colored light in the diffuser and indirect lighting under the diffuser.

Our advantage... **induction charging** on a standard or customized charging base. The lamp turns off automatically while charging but keeps the last settings in memory. Controllable by **switch or remotely**, it's your choice!

The indirect light does not dazzle and creates a warm atmosphere that favors the tête-à-tête. Heavy, **solid stainless steel** lamp, wind and water-resistant. Easy to clean with a damp cloth.

CUSTOM LAMPS OR TAILOR MADE

Example of tailor-made creation
For the 3* Restaurant **Sébastien BRAS** in Laguiole (12)

TAILOR-MADE
DESIGN

CUSTOMIZABLE INDUCTION CHARGING STATIONS

Inductive charging avoids handling which weakens the cables or connectors. This is the guarantee of greater longevity!

We offer **2 sizes** of charging stations (unique or multi-bases) as standard.

We can study the installation of chargers on **specific furniture** in the dining room or in storage (trolleys, shelves, furnitures...). Integration is invisible and perfectly aesthetic.

WIRELESS CONTROL

Thanks to our optional **wifi control module** all our lamps can be remotely controlled by SmartPhone or by control panel: personalized colors, scenarios and lighting sequences, intensity and color modulations. A truly dazzling option !

TESTIMONIALS

We have collaborated with Obélie to create lamps with a unique design. We liked the the technical competence, the careful and meticulous realisation. The induction charging is very easy to use the warm white temperature of light is just perfect, it's neither too cold nor too warm and we appreciate the fact that we can remotely, precisely and simultaneously control the light of all the lamps according to the light conditions in the room... I recommend it!

Charles Meyer
Restaurant Sébastien Bras, Laguiole (12)

We have equipped our Cabaret with Obelie lamps with the remote control module. Thus we can modulate the lighting atmosphere table by table, create effects to accompany the show... It's magic !

Patrice Chevalier
Le Grand Cabaret, Vieux-Berquin (59)

Induction charging is very convenient, everything becomes easier and faster. No wire, no connector to plug in, and no associated breakdowns. I put it on the charging station, it charges! The autonomy is really good and the lamps are qualitative... Excellent product!
