

**topstop**

**Scent Marketing.** Our sense of smell is the only sense connected to our limbic system, which controls memory and emotions. We react emotionally to a scent before we can even recognize its name. This has a subconscious effect on our behavior. Air fresheners have the strongest impact on enhancing people's behavior.

**revo1.** New generation of ultra-concentrated cleaning products. By recognizing the value of fragrance, we create your cleaning products with the fragrance of your choice! Thus, your space will acquire a unique aromatic identity.

**svavo.** A complete range of dispensers for sanitary areas. Modern design, high quality, homogeneity, offer a unique user experience.

**Our fragrances.** A world of olfactory sensations expressed in the form of the best compositions we have created for you, but also through your own ideas that will help us create your own unique fragrance together, in complete harmony with the aesthetics of your space.

Using your fragrance, we have a full range of systems, aiming to create a unique aromatic experience for your guests:

- Electric Diffusers (twin fluid nebulizers).
- Reed Diffusers (sticks).
- Liquid Spray (manual spraying).
- Pillow Scent (fabric fragrance).
- Revo1 (ultra-concentrated cleaning products).

We produce our perfumes in modern facilities licensed by the Greek National Organization for Medicines and the General Chemical State Laboratory, certified with ISO 9001 & ISO 22716 by TUV HELLAS (TUV NORD). We choose the raw materials from leading European fragrance producers with very strict criteria and after a detailed study, we exceed the already very strict requirements of the European Union regarding allergens and environmental protection.

## Electric Diffusers

Cold air diffusion, also known as nebulization, is a state-of-the-art technology developed to diffuse fragrances. The devices that utilize this technology use filtered cold air to break down the fragrance into tiny particles. Diffusion of fragrance with cold air is the safest and cleanest way to scent your space.

## Reed Diffusers (Sticks)

Natural evaporation room air fresheners with wooden bamboo or black fiber sticks.

Glass containers designed to create a unique atmosphere, leaving an unforgettable olfactory experience to your guests.

Ideal for rooms and small spaces, they complement and strengthen the aromatic identity in your space.

## Liquid Spray

Liquid room fragrance for manual spraying. Ideal for freshening up rooms and wherever an instant solution with an immediate effect is required.

## Pillow Scent

Liquid fabric fragrance for manual spraying. Available with the Flairosol spray system, the world's best manual diffusion system. Ideal for direct spraying on pillows, sheets, towels, curtains, etc.

## revo1

**New Gen Cleaning.** New generation cleaning products, ultra-concentrated and packed in a vacuum bag, with the scent of your choice. You create the final product yourself by adding water to the special multi-use bottles and a bag of the concentrated product. The **revo1** system achieves:

**90% less waste volume.** Bags, when emptied, reduce the volume of waste to a minimum, unlike plastic containers, which remain unchanged.

**Reduce: 70% less plastic.** Our bag reduces the use of plastics to what is absolutely necessary.

**Reuse.** With the special multi-use bottles, we reduce the use of plastics to a minimum.

**70% reduction in transport costs.**

Indirectly meaning less energy consumption. Products fully biodegradable and without any labelling requirements on the final product (where possible).

## svavo

**svavo plaza.** We present a new series of dispensers for sanitary areas, which we have available in exclusive on the Greek market. High quality, modern design, family range. All dispensers have the same design pattern, giving homogeneity to the space. They accept common types of paper and soap, giving you the flexibility to choose the supplies you use, with no restrictions. They are available in white and black color, at very competitive prices.
