objects to be with

ikitree aims to bring objects that you can cherish. The objects you keep around you and feel comfortable with. Beautifully special, and great to have around. Pleasant in character; proud, yet humble. Lasting items that are balanced in every aspect of their design: objects to be with.

Products With Character

In the quest to achieve fine lighting, ikitree brings beautiful materials to life. The shades of ikitree lamps are made of hand-poured porcelain. Most lamps are made very thin, this enables the light to shine through the material with a wonderful sandy glow.

ikitree designs celebrate material qualities. This charges them with authenticity. They are manufactured in series, with their design tailored for this. It leads to series production of products loaded with character.

Improviser

porcelain clock

ikitree

Improviser

porcelain clock

Improviser is a clock made of a beautiful porcelain slab. Every clock is unique and different.

The organic outline of this clock is the result of hand-pouring porcelain on a flat base. The porcelain flows outwards and then it stops in its path.

SKU

dark grey:	110.010.1
soft pink:	110.010.2
white:	110.010.3

Packaging

ikitree products ship in their own custom packaging. All our packaging designs are as small as we could possibly make them. The material we use for packaging is mostly corrugated cardboard that has been recycled and can be recycled again.

Objects to be with

Customized Orders

The designs of the products in this catalogue are not normally customized, e.g. their color, size and form.

Subjects that can be customized are:

- cord length
- exclusion of ceiling caps
- exclusion of consumer packaging

All depending on the order amount. Please get in touch to discuss details:

b2b@ikitree.com

ikitree also runs a professional industrial product design service. For new or tailored product design you can get in touch with Mats Hellman, founder of ikitree:

About Mats Hellman

founder and designer

Some designs, just like art, can initiate a moment of joy, awareness, fascination... Achieving such a positive effect with an everyday object is my goal in product design. Or as the Japanese describe it, it's my *ikigai*.

I'm both Finnish and Dutch. And, as a child, I spent some years living in Japan. The design languages of these three cultures have an influence on my work.

After education, I spent 15 years working as a product designer at several Dutch design firms (Reggs, Scope Design, Alskar Design, Helder innovation and development). This was a great experience working in skilled teams on many different products. It has honed my skills in a valuable way.

After this experience, it's time to channel my skills and focus on why I started product design. I seek to create beauty in everyday, simple objects. Lasting items that are balanced every aspect of their design. I founded *ikitree*, time to create objects to be with.
