About Us

In 2019, Joshua and Ainu, two brothers on a mission, founded Bamboovement. More than just a brand, we represent innovation in harmony with nature. Together with a passionate team, we are committed to stopping the flow of unnecessary plastic waste. We create high-quality, plastic-free personal care products and dream of a future where plastic-free is the standard.

Certification

CO2 neutral

Our products are carbon-neutral. Together with ClimatePartner, we are working on a carbon-neutral product range. Carbon lifecycle analyses determine how much we need to contribute to verified climate projects in each case to offset emissions.

FSC

Our bamboo products and packaging are FSC-certified. Forest Stewardship Council is a non-profit organisation dedicated to sustainable forest management. We are proud of our certificate and hope to use it to inspire people and companies to work together for a sustainable future.

BSCI

Through BSCI audits of our suppliers, we assess labour standards throughout our supply chain. This is how we guarantee ethical working conditions, a healthy environmental policy, no child labour and fair remuneration.

ISO

Our products comply with strict ISO quality standards such as 9001:2015, 14001:2015 and 22716 to ensure consistently high quality in all aspects of production

Discover Bamboovement's shave kit, where luxury meets sustainability for your discerning hotel guests. Crafted from 99% plastic-free materials, our award-winning disposable razor harnesses upcycled wood waste. Together with our natural shave cream in a corn-starch tube, this kit delivers an unparalleled shaving experience.

Our continuous push to challenge industry standards has been recognised, with consumers and experts crowning our razor as the **"Best New Product 2023"** from hundreds of ESG novelties at Vivaness, the leading sustainability expo.

Shave Kit

ClimatePartner Projects

At Bamboovement, we do more than create; we catalyse change. Through extensive life cycle analyses, we face our ecological impact head-on. While our products emit less than plastic alternatives, they're not entirely carbon-neutral. But, we respond proactively—offsetting impacts by supporting inspirational projects. Explore some of our chosen endeavours below.

Global

Plastic Bank

In our unique initiative, we intertwine certified climate projects with robust ocean protection. With every ton of CO2 reduction, we remove 10kg of coastal plastic, preserving marine life. Through Plastic Bank, we transform waste into empowerment, uplifting vulnerable coastal communities while protecting our planet.

Matavén Forest, Colombia

Reforestation Project

In the heart of the Matavén Forest's Indigenous Reservation, REDD+ Matavén unfolds, a sanctuary for biodiversity. It's not just a conservation project—it's a life force, nurturing 15,932 indigenous lives with education, healthcare, and more.

Eden Reforestation Projects

Beyond our alliance with ClimatePartner, we breathe life into Earth by planting trees, nurturing the roots of a greener tomorrow. This is brought to fruition through our partnership with Eden Reforestation Projects, as we together weave the tapestry of restoration and resilience, one tree at a time.

Eden Reforestation Projects is a non-profit organisation committed to restoring healthy forests and reducing poverty in some of the world's most devastated regions. By hiring local villagers to plant millions of trees annually, Eden Reforestation Projects simultaneously promotes economic stability and environmental revitalisation.
